

Dear Friends of Sharing the Presence,

the new Timeless Wisdom Training starts in November 2010 – thus we would now like to draw your attention to the two introductory weekends in April and September 2010. The weekends offer the opportunity for you and for Thomas to get to know each other and to decide whether you want to engage in this intense time together. However, to start with we would like to ask you to get clear for yourselves about whether you are really able to commit to a two- to three-year training as places are restricted and we have a great demand for them. We would ask that only those of you who are seriously interested register for the introductory weekends. Many thanks.

With all best wishes

Your team of Sharing the Presence

TIMELESS WISDOM TRAINING 2010-2013

Eighty participants of the current Timeless Wisdom Training have started their second year of training. They have mastered a challenging and intense time of group experience with individual clearing processes and great advances in development. The sense of a „New We“ has become palpable for them, and originating from the training many new creative projects have developed. Before the participants will complete their three-year training at the Academy of Inner Science in 2011 another special highlight is waiting for them: the 18-day meditation journey into the Himalaya.

The new training block will start in November 2010. Thomas Hübl and his team of lecturers offer a training that promotes putting the practice of awakens and transparency over an extended period of time into the focus of our lives. Yoga, Tai Chi and meditation, creativity and intuition workshops as well as stillness retreats complement the programme for the participants who will move within the course of the three years through a clearing process of self-development and who will train various skills like their intuition, interpersonal skills or the capacity to interact. The introduction into an integral perspective will also be part of the training.

The first year of the training focusses on the exploration of our „I“-identification. The growing clarity of the group creates more and more room for clarity and presence in every individual: Not integrated parts in our development can be made conscious more easily and can thus also be integrated more easily. We learn the tool of „Transparent Communication“ as a holistic spiritual practice for a contemporary mystic. Our authentic expression – and thus the call of our potential – can unfold more easily. At the same time there will be an introduction into spiritual practices like meditation, contemplation and increased body awareness.

The second year of the training is fully focussed on a „new We“. How can the inner clarity and awakens contribute creatively in a collective context? We open ourselves for a deeper global understanding of the world and learn to apply the dynamics of collective intelligence in different areas: in companies, institutions, schools, but also in the context of the whole society. A substantial part of the training is comprised of the realization of a project that contributes to manifest a new awakens in the world in a sustainable way.

In the third year of the training we move our focus to transpersonal areas and immerse ourselves in the stillness and timeless wisdom. We look at the essence, the emptiness, the original reason, the light of God, whatever term one likes to use. We investigate universal principles of our reality and how we can align to this act of creation.

The Timeless Wisdom Training invites us to bring presence, clarity and compassion into all areas of our life and at the same time confront the complex topics of our Earth. If we move away from a view that is centred around the I and open ourselves to a greater perspective we can investigate how an awake culture can find creative answers to the burning topics of our times.

There will be two introductory weekends in Seminarhaus Hof Oberlethe, Germany.

Dates: 30th April to 2nd May 2010 & 24th – 26th September 2010

If you would like to take part in the new Timeless Wisdom Training 2010 please register for an introductory weekend via e-mail or phone:

*„Sincere compassion and our capacity to give are two factors that determine our contribution to the collective intelligence of humanity to a considerable extent. The more we hold back the less we support the „new We“ that is currently underway into the heights of the human intelligence. If we on the other hand contribute in every moment our quality and intelligence as species increase. The way we walk on the street, drive a car, communicate with our children or sit in a room without speaking – all this has an effect. We are often no longer aware of this resonance since we are too occupied with ourselves. However, if we become more present and sensitive for the world in which we live, for the joint basis of our lives, we realize the effects of our mindfulness on our surroundings and of course on ourselves.“ **Thomas Hübl***
