

ACADEMY OF INNER SCIENCE

The Academy of Inner Science (AIS) is a research institute for mysticism of the third millennium where timeless wisdom, innovation and evolution meet for a dance of life. A platform for mystic insights in the middle of a fast developing life which makes an enormous knowledge available for us. Fundamental fresh insights of science shall be positioned on a wise basis.

The timeless wisdom can be found in the core of all spiritual traditions. Dressed up in various socio-cultural faces it has chosen different clothes and forms - and presents like that to the world. But when we recognize those garments and drop them, always the same essence turns up.

In the beginning of the third millennium we use a very digital language. We immerse in virtual universes and mother earth is becoming a global village. Many of our questions lead us to collective levels of insight. New ways of thinking and feeling will be essential to find solutions for global issues and challenges. The human race discovers itself increasingly as a network of information and the age of communication has brought us more closely together. A new We and the understanding of collective intelligence appear on the stage of life.

The fact that there are so many different nations, cultures and traditions, so totally different ways of living, preferences and forms of existence has gained ground already in every sitting-room.

It is about time to expand consciously even our inner experience in these dimensions and potentials. Only if we feel the inner experience of expansion up to the whole, only then we can think, feel and act accordingly. We can start manifesting an enlightened life when our private journey of enlightenment includes the rest of the world and when we wake up from the narcissistic way of enlightenment to an authentic way of serving and giving in this world and when we realize that all the children are our children. We hear the call of the creative impulse of the universe and fulfill our evolutionary responsibility.

The Academy of Inner Science is an invitation for all the heroines and heroes of consciousness to study closely the pulse of evolution. The Academy inspires to wake up and go from the "spiritual journey of relaxation" towards the genuine life. The authentic path of the One Human Being is beyond a very soothing and needs us all the entire day. Wanting to live an awakened life amidst a post-modern society is a challenge which all the pioneers of consciousness have to face. All the ages authentic mystics have proofed evidence in putting their whole life in the service of the One. They made history in the foreground and in the background.

We all carry the mystic part of life within us. But - do we have the courage to let the fire of awareness burn in all the fields of our life? This goes far beyond reading books or visiting occasionally some workshops. It is a job of 24 hours a day, each day of the

year, each year of our life.

The Academy of Inner Science puts a frame of radical exploration of life in disposal. Everyone who hears the shout for wakefulness inside and responds is invited to give a contribution to an awakened world.

We will present different inter-related topics and sources of wisdom - passed on by authentic and experienced teachers - in order to transform the post-modern everyday life into an awakened life that goes beyond "my enlightenment". One we have taken this step the journey really starts...

To recognize eternity in this Now and in the dance of life equally, hearing the songs of the new morning in the eternal Now - these are the motivations of mystics in every time period. Being on duty of the One and recognizing the act of creation up to the first cause while entering the halls of silence - these are the tracks where we follow the masters in all periods of time. Are we ready to take over their paths as a source of inspiration and make them bloom in our own life in a unique way?

All levels in our life - no matter where the fire of our interest will lead us - Are steppingstones towards awareness. Our honesty will lead us the way to make the light of the One World in an eternal creative emptiness.

As soon as we find the motivation beyond all motivations the power of the One leads us home. This we will share together.
