

ACADEMY OF INNER SCIENCE

Newsletter 03/2008

To all readers who are interested in the academy.

The Academy of Inner Science opened its doors on the 1st of January 2008.

This is the starting point for an extensive platform of consciousness which offers an environment for a wide range of activities and events. The first big step will be the Timeless Wisdom Training events, which will start in September 2008. There will be three introduction weekends which will give you the opportunity to gain insight into the aim of the training courses and the work of Thomas Hübl and his team.

Apart from the three-year training course we also offer a number of interesting workshops and events which can be booked independently from the three-year training course.

Current events in the academy

A summary of the events of the academy scheduled for 2008 is given below. All events can be booked individually. Further information can be found on the website with the following link: <http://www.innerscience.info/content/view/13/28/lang,german/>

Timeless Wisdom Training

The two or three-year training course will guide us deeply into the mystery of life. Thomas Hübl and his team of guest speakers will create an environment in which participants will be able to steer their lives into a completely new direction. With the abilities gained at the courses such as enhanced intuition, social competence, the ability of interaction and their manifestation in the world in the form of concrete projects, the course offers an apprenticeship which reflects our modern-day age.

Introduction weekends

There are three introduction weekends which give you the opportunity to get to know Thomas' work and also find answers to all questions regarding training.

The first introduction weekend near Munich was a success! More than 30 people have decided to take part in the three-year-training course! Should you wish to attend at one of the following dates please enrol by e-mail or phone.

Upcoming dates: 16 to 18 May/ 22 to 24 August

Conference:

Synergy and collective intelligence

Community Conference – 3rd to 6th of July 2008 in Berlin

Extraordinary creativity and effectiveness can emerge when an entire group of people – for instance in communities or business – are willing to synchronize their thinking through alignment with a common concern.

Collective Wisdom, Synergy of Teams, Co-intelligence – all these terms point to the fact that humans are discovering that wholes can become more than the sum of their parts. Groups of humans can become more intelligent than the individuals they comprise.

With Thomas Hübl, Scilla Elworthy, Auke van Nimwegen, Margrit Kennedy

Research groups

Apart from the events, the academy also provides a platform for various research groups focusing on consciousness. Two research groups have already been formed.

- **Communities**

This research group formed when the Academy started. At the moment the team comprises experienced community members. The group is organising a congress which will be held from 3 to 6 July (see above).

- **Economy**

“What would happen if we were living in a world in which everything is obvious. Nothing is hidden, nothing stays concealed. You know what the people you are living with feel, how each individual on this planet is. If there is only one person out of balance, then it is your highest priority to help this person to regain their balance ...”.

- What effect would this have on companies, the economy?
- Can we live in a world in which completely new approaches to cooperation prevail? In which we do not act out of fear but out of our authenticity and towards the aim that our work is a service for public welfare?
- How does the economy evolve? What are the rules? How can we influence these?

We ask ourselves these and many other questions related to this topic.

The website features regular updates on the latest results and activities of the research groups.

How do research groups form in the Academy?

These communities are formed out of interested and self-motivated people who want to take a closer look at certain topics. These groups are self-organised. They have a direct reference to the topics and fields of interest of the Academy. The groups can focus on such topics as education, the school system, environment, politics, economy, relationships, nutrition and so on. If you would like to form your own research group and you are looking for people with the same interests, the

Academy can offer you a platform to meet such people.

Please contact us for more detailed information.

Transparent communication

Thomas Hübl wrote an interesting article about "transparent communication" which we think is an important tool in accompanying individuals and groups.

A brief extract of the text is given below. The full article can be viewed on the website.

http://www.innerscience.info/pdf/Transparent_communication_E.pdf

„The more we see the people we are living with from the inside, the clearer and more sympathetic our communication is.- This is the foundation for a new We.

We often accept the world how it seems to be to us. We believe that the world is the way we see it. But can we recognise that every person turns the world into "his" or "her" own world? Moment after moment. We colour reality in a certain way and make it our own "universe of experience", "our" life, "our" space of inner experience ..." (Thomas Hübl)
